

5TH CATEGORY - HISTORIC RACING

GROUP Nb

APPROVED VEHICLE SPECIFICATION

This form details the approved specifications of individual vehicle models in the 5th Category Historic car group. To be issued with a Historic Log Book, cars need to comply with these specifications, the physical appearance shown in the illustrations and the general historic rules as detailed in the current CAMS Manual of Motor Sport.

Make of Car: Ford Model: Mercury Comet Caliente

Period of Original Manufacture: 1963 to 64

CAMS Historic Group: Nb

Date of issue of this document: April 2013

Refer to CAMS Manual of Motor Sport, Vehicle Eligibility, Historic Touring Cars, General Requirements & Nb Regulations for permitted modifications.

1.1 CHASSIS FRAME

Description: Uni-body, two door pillar less coupe, welded pressed steel

Period of Manufacture: 1963 to 64

Manufacturer: Ford Motor Co Ltd
Chassis no. from: 4H23K - 500001
Chassis no. location: Left inner front fender

Material: Steel

Comments: Originally LHD only

1.2 FRONT SUSPENSION

Description: Independent, with upper wishbone & lower arm with tension rod

Spring Medium: Coil

Damper Type:TelescopicAdjustable:NoAnti-sway bar:FittedAdjustable:No

Suspension adjustable: No

1.3 REAR SUSPENSION

Description: Live axle

Spring medium: Semi – elliptical leaf

Damper type: Telescopic Adjustable: No

Anti-sway bar: No Suspension adjustable: No

1.4 STEERING

Type: Recirculating ball Make: Ford

1.5 BRAKES

Front Rear

Hydraulic

Type: Disc, vented Drum, single leading shoe
Dimensions: 292 x 31.75 mm 279.4 x 63.5 mm
Material: Cast iron Cast iron
No. cylinders/pots per wheel: Four One

Actuation: Hydraulic
Caliper Make: Ford
Caliper Type: Fixed

Caliper Material: Cast iron

Master cylinder make: Ford Type: Duel

Adjustable bias: No Servo Fitted: Yes

SECTION 2 - ENGINE

2.1 ENGINE

Make: Ford

Model: W289HP or W302 blocks permitted.

No. cylinders: Eight Configuration: Vee
Cylinder block material: Cast iron Two/Four Stroke: Four

Bore - Original:101.76 mmMax. allowed:103.26 mmStroke - original:72.9 mmMax. allowed:72.9 mmCapacity - original:4728 ccMax. allowed:4869 cc

Cooling method: Liquid Identifying marks: N/A

Comments:

Cylinder blocks with either 5 bolt or 6 bolt bell housing fixture permitted.

Ford M-6010-BOSS 302 block with a rev limit of 7500rpm as a replacement for the Windsor 289 or 302 block is approved for use. Log book endorsed and the engine sealed required.

2.2 CYLINDER HEAD

Make: Ford

No. of valves/cylinder: Two Inlet: One Exhaust: One
No. of ports total: Eight Inlet: Four Exhaust: Four
No. of camshafts: One Location: Block Drive: Chain

Valve actuation: Pushrod & rocker

Spark plugs/cylinder: One **Identifying marks:** N/A

Comments:

Conditional upon individual application.

The RHS[™] Pro Action[™] Small Block Ford Cylinder Head, part no: 35304 or World Products Windsor Junior cylinder heads with 180cc volume per inlet runner are allowed:

Subject to the heads being in manufactures states. Save for the cylinder head gasket face & matching of the inlet ports by not more than 12mm from the port face.

Log book endorsed and the engine sealed required.

Refer attached Allowances and Sealing Procedure Documents

2.3 LUBRICATION

Method: Wet sump

Oil cooler standard: No

2.4 IGNITION SYSTEM

Type: Coil & distributor

Make: Ford

2.5 FUEL SYSTEM

Carburettor Make: Ford, four barrel **Model:** C40F – 9510

Carburettor number: One Size: N/A

SECTION 3 - TRANSMISSION

3.1 CLUTCH

Make: Ford

Type: Diaphragm

Diameter: 267 mm **No. of Plates:** One

Actuation: Mechanical

3.2 TRANSMISSION

Type: Synchro – mesh

Make: T&C

No. forward speeds: Four Gearbox location: Behind Engine

Gear change type and location: Remote, floor shift

Case material: Cast iron Identifying marks: N/A

3.3 FINAL DRIVE

Make: Ford Model: 8.5 & 9 inch allowed

Type: Live axle, semi – floating

Wheel drive method: Rear

Ratios: 3.25, 3.50, 3.89, 4.11, 4.29 & 4.57

Differential type: Limited slip

3.4 TRANSMISSION SHAFTS (EXPOSED)

Number: One

Description: Tubular steel open tailshaft

3.5 WHEELS & TYRES

Wheel type - Original: Disc Material - Original: Steel

Allowed: Period cast Allowed: Alloy Fixture method: Studs No. studs: Five

Wheel dia. & rim width: FRONT REAR

Original: 15×6.5 inch 15×6.5 inchAllowed: 15×6.0 inch 15×6.0 inchTyres original:7.10/6.70 - 157.10/6.70 - 15

Tyres allowed: 60% minimum aspect ratio, refer approved tyre list.

SECTION 4 - GENERAL

4.1 FUEL SYSTEM

Tank Location: Boot x 2 **Capacity:** Main tank 75.8 litre

Aux tank 64.0 litre

Fuel pump type and location: Mechanical / engine, Make: Variable suppliers

Electrical / N/A

4.2 ELECTRICAL SYSTEM

Voltage: 12 Generator or Alternator: Alternator

Battery Location: Engine compartment

4.3 BODYWORK

Type: Closed touring Material: Steel
No. of seats: Five No. doors: Two
Comments: Alloy front and rear bumpers & grille permitted.

Spring tower supports where optional.

4.4 DIMENSIONS

Track - Front:1411 mmRear:1422 mmWheelbase:2900 mmOverall length:4960 mm

Dry weight: 1200kg

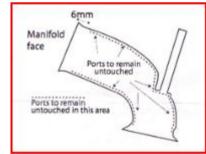

4.5 SAFETY EQUIPMENT
Refer applicable Group Regulations

Sealing procedure for engines using the substitute cylinder head (289 or 302)

- 1. Engine to be assemble to short motor without sump.
- 2. Heads to be assembled ready to be fitted to engine.
- 3. 2 sump bolts/studs to be drilled. 2 top timing case bolts/studs to be drilled.
- 4. The sealer will pick two valves from one cylinder of either head to be removed to check that under the valve head and the ports are unmodified and that the valve heads are 1.94" in diameter for the inlet, and 1.6" for the exhaust.
- 5. Check the inlet and exhaust ports are unmodified except for the allowance allowed, from the manifold faces, into the port for manifold alignment.
- 6. Combustion chambers are to be as per above.
- 7. Measure bore and stroke.
- 8. Note whether 2 bolt or 4 bolt block.
- 9. Fit sump and fit seal. Seal timing case.
- 10. Fit heads and drill holes in appropriate positions in the corners of the block and heads to enable wire and seals to be fitted.
- 11. Seal heads to block. Note seal numbers. <u>Competitor gets a signed sealers document</u>. Note: If the heads are removed they must be re-sealed following the above points 4, 5, 10 and 11.

Allowances

- 1. Surfacing of the head face is allowed to achieve required combustion chamber volume or restore the cylinder head from engine failure damage and/or overheating.
- 2. K Line .030" bronze valve guide inserts are allowed if required and to recondition to standard size from excessive wear.
- 3. Port match inlet and exhaust ports to manifold to a maximum of the allowed depth from the manifold face. <u>Inlet and exhaust ports must be left completely untouched from under the valve</u> seats to within allowed depth from the manifold face.
- 4. Machining is allowed of the valve spring pad and valve guide outside diameter and length as well as pushrod holes. This will enable spring locators, valve springs, stem seals, valve spring installation height and pushrod clearance to be correctly set up and fitted.
- 5. 289 and early 302 Windsor 2 bolt block engines require the drilling of steam water passage holes in the cylinder head face to match the engine block. This is outlined in the World Products assembly guide headed "Machine Shop Specs'.

- 6. Valve seat cutting/grinding is allowed, but the original valve sizes of 1.94" inlet and 1.6" exhaust must be retained. No machining is permitted under the valve seat.
- 7. <u>No machining is permitted in the combustion chamber.</u> Combustion chambers must be left completely untouched except for original machining by the manufacturer.
 - ie. No machining, no hard or soft wire brushing, no coarse or fine grinding either by hand, machine or high speed grinder etc, no shot peening, no sand blasting, no glass bead blasting, no water blasting, no hand scraping, no filing, no emery wheels or stones, no acid etching, no chiselling, no hammering or pneumatic peening, no flexi honing, no spark eroding, no removal of any metal by milling machine.
 - The <u>only</u> exception is the metal between the inlet valve head and the exhaust valve head which may be rounded in case it creates a hot spot.
